DINESH R

CYBERSECURITY STUDENT

CAREER OBJECTIVE

To secure a challenging position as a Cybersecurity professional where I can apply my knowledge of networking, Linux, and web development, while continuously learning new technologies and contributing to building secure, reliable digital systems.

PROFILE

Motivated B.E. Cyber Security student with an interest in cybersecurity, web development, Linux, programming and networking. Passionate about building practical projects, learning new technologies and creating modern digital experiences.

PROJECTS

01 MP Frames

Web Development | 2026

Photo-frame e-commerce website with product categories, product details, cart and checkout features.

Technologies: HTML • CSS • JavaScript • Firebase

Live: mp-frames.vercel.app

02 Dinesh Fashion

Web Development | 2026

Modern fashion website designed with responsive UI and user-friendly navigation.

Technologies: HTML • CSS • JavaScript

Live: dineshh07.github.io/dinesh-fashion

03 Personal Portfolio

Personal Project | 2026

Personal portfolio website showcasing my education, skills, projects and learning journey.

Technologies: HTML • CSS • JavaScript

Live: dineshh07.github.io/dhine-Portfolio-

04 Password Strength Checker

Cybersecurity Project | 2026

A web-based Password Strength Checker designed to analyze password security and provide instant feedback. The project helps users understand password strength and encourages the creation of stronger and more secure passwords.

Technologies: HTML • CSS • JavaScript

Live: dineshh07.github.io/Password-Strength-Checker

05 Mystic Studio

Web Development Project | 2026

MYSTIC STUDIO is a modern and creative digital platform designed with an attractive user interface and responsive experience. The project focuses on providing a visually engaging platform for creators while showcasing modern web design and development skills.

Technologies: HTML • CSS • JavaScript

Live: dineshh07.github.io/MYSTIC-STUDIO

06 Hackathons

Hackathon Projects | 2026

Participated in hackathon-based project development, focusing on solving real-world problems through innovative technology solutions. Developed practical projects by combining web development, cybersecurity concepts, and modern technologies.

Technologies: HTML • CSS • JavaScript

Live: dineshh07.github.io/PhishGuard (Featured Hackathon Project)

EDUCATION

B.E. Cyber Security

SRM Valliammai Engineering College | 2026 – Present

Currently developing knowledge in cybersecurity, programming, networking, Linux and web technologies.

Higher Secondary — 12th

Shree Niketan Matric Hr. Sec. School | 498 / 600 — 83%

Secondary School — 10th

Chinni Sriramulu Chetty Vivekananda Vidyalaya Matriculation School | 388 / 500 — 77.6%
